

ASSISTIVE DEVICE	DEFINITION	SPECIFICATION
1. Axillary Crutches ISO Code: 12.03.12 	Devices providing support when walking that have a horizontal padded support that is placed against the upper body next to the armpit	- Constructed from aluminum alloy tubes. Standard thickness. - High density rubber horizontal bar, cushioned, fitting under the axilla - Handgrip: high density rubber/ plastic covered handle, pistol grip or rounded. - Leg and arm sections adjust independently for optimum sizing-both floor to handgrip height and the distance between the handgrip and the axilla pad is adjustable. - Tips: non-slip, and replaceable/ interchangeable, usually made of durable rubber, meets ISO standards. Available in small, medium or large sizes - Double molded hand grip with soft cushioning. - Height-adjustment mechanism: double height adjustment (handgrip and shaft) - Rubber Tips/Ferrule securely fitted and made from durable rubber with steel washer built inside. - Max/min adjustable height: 984/745 ± 5 mm - Weight bearing capacity: 120kg - Size: Large, Medium, Small (depending on the age/condition)
2. Elbow Crutches ISO Code: 12.03.06 	Devices, adjustable in height, providing support when walking that have a semi-circular support for the elbow, a horizontal hand grip, a single shaft, and one tip	Designed for short- or long-term use by children or adults who require support to maintain balance or bear weight through their legs due to injury, disability, or surgery recovery. 1. Cuff - Closed or semi-circle design for secure forearm placement - Hinged or fixed attachment for adjustability and ease of movement - Material: Durable, lightweight, and non-abrasive plastic or composite material - Comfort & Fit: Ergonomically contoured to provide secure yet comfortable forearm support - Padding optional for added comfort and pressure relief 2. Handgrip - Ergonomically molded for a natural grip - Material: Non-slip, high-density rubber or thermoplastic for durability and comfort - Orientation: Left and right-hand specific grips where applicable

राम भट्टराई
नि. प्रमुख प्रशासकीय अधिकृत

			3. Shaft • Lightweight yet strong (e.g., standard thickness aluminum, reinforced composite) • Corrosion-resistant for indoor and outdoor use • Height Adjustment: Single or double height-adjustment mechanisms: Single Adjustment: Adjustable shaft only, Double Adjustment: Adjustable cuff and shaft • Mechanism Types: Quick-release push-button or secure clip-lock system 4. Tip (Ferrule) • High-quality, durable rubber with anti-slip properties • Suitable for varying environments (indoor, outdoor, wet/slippery surfaces) • Replaceable • Fit: Securely attached to the shaft; does not loosen during use 5. Sizing & Load Capacity • Available Sizes: At least four distinct sizes to accommodate a range of users (Child, Youth, Adult, Tall Adult) • Load Bearing Capacity: Standard crutches: up to 120 kg • Bariatric Range: Reinforced design for users over 120 kg, must retain full functionality and comfort under heavier loads
3. Walking sticks/canes ISO Code: 12.03.03		Adjustable/non-adjustable mobility device with a handgrip Types: • L-stick • Tripods • Quadri pods	• Constructed from aluminum alloy tubes. • ABS handle with comfortable grip. • Height-adjustment mechanism: Telescopic, quick-release • Soft gel on handle top • Tips securely fitted, non-slip, and replaceable or interchangeable • Weight bearing capacity: 110kg • Size: Large, Medium, Small

4. Walking Frames / Walker ISO Code: 12.06.03 	Frame that helps a person to maintain stability and balance while walking or standing, with either four tips (ferrules) or two tips and two castors	1. Frame - Made from rigid aluminum tubing for high durability and weight support across age groups - Stable, anti-tip design suitable for users with varying mobility needs 2. Foldability - Fully foldable design for convenient storage and transport - Compact folded depth: 10 cm for space-saving storage 3. Handle Grips - Equipped with soft foam hand grips for enhanced comfort and slip resistance - Suitable for prolonged use by children, adults, and elderly users 4. Dimensions & Size Options - Width: 52 cm (standard); narrower versions for pediatric use as needed - Height Range (Adjustable): - Children: 50 cm – 65 cm - Youth: 66 cm – 78 cm - Adults: 79 cm – 91.5 cm - Available Sizes: Small (Child), Medium (Youth), Large (Adult/Elderly) 5. Weight & Capacity - Walker weight: Approximately 3.3 kg (may vary slightly with size) - Weight-bearing capacity: Up to 125 kg for adult and bariatric models - Pediatric models designed for safe load-bearing as per age/weight standards
5. Walker with wheel ISO Code: 12.06.03 	Short- or long-term use for child or adult who needs support to balance or bear weight through their legs	1. Frame - Made from rigid aluminum tubing for high durability and weight support across age groups - Stable, anti-tip design suitable for users with varying mobility needs 2. Foldability - Fully foldable design for convenient storage and transport - Compact folded depth: 10 cm for space-saving storage 3. Handle Grips - Equipped with soft foam hand grips for enhanced comfort and slip resistance - Suitable for prolonged use by children, adults, and elderly users 4. Dimensions & Size Options - Width: 52 cm (standard); narrower versions for pediatric use as needed

			- Height Range (Adjustable): - Children: 50 cm – 65 cm - Youth: 66 cm – 78 cm - Adults: 79 cm – 91.5 cm - Available Sizes: Small (Child), Medium (Youth), Large (Adult/Elderly) 5. Weight & Capacity - Walker weight: Approximately 3.3 kg (may vary slightly with size) - Weight-bearing capacity: Up to 125 kg for adult and bariatric models - Pediatric models designed for safe load-bearing as per age/weight standards 6. Wheel design for wheeled walker
6.	Rollator  		Short- or long-term use for adult who is frail or needs support to balance or bear weight through their legs Specific characteristics - Pushed in front of user - Frame: - folding or rigid - height-adjustable handgrips - four wheels - seats - Height-adjustment mechanism: - telescopic - quick-release - Handgrips: - molded grips Requirements for standard configuration - Two handgrips - Four wheels with diameter 100 mm - Driving and parking brakes - Fold-down seat May include basket Size range to fit all adults Bariatric range for users over 120 kg
7.	Manual Wheelchair with cushion ISO Code: 12.22.03 Types: - Active - Semi-active - Rough terrain	Intended to be self-propelled by the users by pushing rims or wheels. Can be used indoor/outdoor and on various types of terrain.	- Active/Semi-active wheelchair Wheelchair with folding or rigid frame, three or four wheels with large rear wheels, seat and backrest, armrests and footrests Frame: frame with mechanism(s) to fold or dismantle - High quality steel or aluminum frame-125kg capacity Backrest or back posts with adjustable height or supplied with range of back posts with fixed height. - Detachable, Swing Away Armrests. - Detachable, Swing In, Swing Out Leg rest

प्रमुख प्रशासकीय अधिकृत

- **Footrests:** with adjustable height to accommodate people with shorter and longer legs. Two flip-up, swing-away or removable footrests on folding frame
- **Rear wheels:** quick-release or removable without tools
- **Puncture-proof,** pneumatic rear tyres and front castors
- Anti-tippers for extra safety on slopes and uneven ground.
- **Cushion:**
Supplied with cover that meets general design requirements; for users with incontinence, a water-resistant cover or lining to protect cushion should be supplied
 - overall height approximately 70–120 mm
 - allows full or deep offloading or immersion (sinking into) and envelopment (conforming to shape) 40–45 mm) or deeper
 - different length options or adjustable in length

- **Rough terrain wheelchair**

Wheelchair with folding or rigid frame; three, four or more wheels, with two larger drive wheels; seat and backrest; and footrests behind front castors

- May be lever-propelled
- Longer wheelbase than active wheelchair; larger overall length than transport wheelchair with large rear wheels
- Low center of gravity to ensure stability
- Rear wheels and castors appropriate for outdoor rough terrain

Frame: frame with mechanism(s) to fold or dismantle, push-handles can be integrated into frame, supplied as an add-on component or omitted, integrated stability options for feet, backrest or back-posts with adjustable height or supplied with range of back-posts with fixed height

Backrest: tension-adjustable backrest or rigid backrest that can be adjusted independently from back-posts, quick-release mechanism to be removed to allow folding

Footrests with adjustable height. Two flip-up, swing-away or removable footrests on folding frames.

Rear wheels (manual propelling): with push-rims or lever-propelled and quick-release or removable without tools for rigid frames for transport; optional for wheelchairs with folding frame. Wider or larger-tread tyres

Puncture-proof or pneumatic, rear tyres and front castors

Rear and front wheels (lever propelling): size and width of front and rear wheels appropriate for rough terrain and wheelchair design, three or multiple wheels, puncture-proof or pneumatic wheels

Cushion:

10. Modified shoes/ Orthopedic shoes/ Footwear for diabetes /neuropathic foot/ Shoe Raise ISO Code: 06.33.30		Orthopedic shoes are specially designed footwear intended to provide support, proper alignment, comfort, and relief for individuals with various foot and lower limb conditions or deformities.	Orthopedic shoes come in various styles and can accommodate a range of foot conditions, from common problems like bunions and hammertoes to more serious conditions associated with arthritis or diabetes Specification Materials most include leather, foam rubbers, cellular polymers having long durability and comfortable wearing with ease. Shoe raises are primarily used to compensate for leg length discrepancies, providing a level pelvis and reducing stress on knees, hips and backs. Shoes with a removable insole to add extra depth to footwear or allow custom made insoles. Size: Individual measurement should be taken Note: Locally manufactured item available in Nepal.
11. Club foot shoes/ Foot abduction braces		Device used in the treatment of club foot	Individual measurement should be taken at the referred center Note: Locally manufactured item available in Nepal.
12. Ankle-Foot Orthosis (AFO) / Orthosis for foot drop ISO Code: 06.12.06		Orthosis that encompasses the ankle joint and the whole or part of the foot	Externally applied customized appliances/ device used to support, assist, or correct the weakened segment of the lower extremity in the subtalar region, ankle, and foot. Specifications: 1. Made of durable and elastic polypropylene. 2. Suitable for all types of shoes, can be used while wearing shoes 3. Help with dorsal flexion 4. Light weight, strong durability and load bearing 5. Colors and details can be customized Size: Individual measurement should be taken at the referred center

			Note: Locally manufactured item available in Nepal.
13.	Knee Ankle Foot Orthosis (KAFO)/ Caliper ISO Code: 06.12.12 	Orthosis that encompasses the knee and ankle joints and the foot	A KAFO is a device that is used to control instabilities in the knee and lower limb by maintaining proper alignment and controlling motion. Specification 1. Made of durable and elastic polypropylene. 2. Suitable for all types of shoes, can be used while wearing shoes 3. Help with dorsal flexion 4. Light weight, strong durability and load bearing 5. Colors and details can be customized Size: Individual measurement should be taken at the referred center Note: Locally manufactured item available in Nepal.
14.	Prosthesis  	Upper/ Lower limb prosthesis: The device that encompasses or support the part of upper and lower limb ISO Code: 06.24.09 ISO Code: 06.24.15 ISO Code: 06.18.15 ISO Code: 06.18.09	Size: Individual measurement should be taken at the referred center Note: Locally manufactured/customized item available in Nepal.
15.	Spinal orthosis/ spinal braces ISO Code: 06.03.09 	Thoraco-lumbo-sacral orthoses/brace : Orthosis that encompasses the whole or part of the thoracic, lumbar and sacro-iliac regions of the trunk	Size: Individual measurement should be taken at the referred center Note: Locally manufactured/customized item available in Nepal.

16. CP Chair ISO Code 18.09.39			• CP Chair (with adjustable incline & tray) Hardwood & ply board constructed, naturally finished Chair reclines through an arc and can be adjusted to any desired position. • Comes with adjustable foam padded headrest which can be formed & reformed as needed. • High back supports & holds the child with wide belt. • Laminated activity Tray size 56cm x 63cm with polished wooden raised edges, holds the items from falling. • Adjustable Seat & Foot board are 30cm wide and suits the small children. Mounted on ball bearing castors. • Knee separator Size: Individual measurement should be taken. Note: Locally manufactured item available in Nepal.
17. CP standing frame			• Weight: 35kg • Material: PVC+ Wood and steel frame+ Soft cushion + Vinyl nylon straps • Suitable age: 5-15 years old children (90cm - 130cm) • Height Adjustable for Customized Support • Provides Proper Standing Positions • Improves Posture, Trunk Control, and Balance • Supports Weight-Bearing Exercises and Lower Limb Strengthening • Durable Construction for Longevity Size: Individual measurement should be taken Note: Locally manufactured item available in Nepal.
18. Toilet Chair/ Commode chairs ISO Code: 09.12.03		Chairs, with or without castors, with a built-in collection receptacle used for toileting away from the bathroom	1. Frame & Structure • Material: • Aluminum alloy for strength, corrosion resistance, and lightweight handling • Frame Design: • Foldable or fixed frame options for storage and portability • Anti-slip rubber ferrules on legs to prevent slipping on wet surfaces 2. Seat & Pan • Seat Type: ➢ Ergonomically shaped plastic or padded seat with a central opening ➢ Detachable seat cover for hygiene • Commode Pan: Removable plastic or stainless-steel pan with handle and lid • Capacity: Minimum 5 liters • Easy to clean and sanitize Comfort & Safety Features

21. White Cane ISO Code: 12.39.03 	Devices for navigation or identification of the surroundings used by a person with a visual impairment	Design & Construction • Long, straight shaft designed to extend from the ground to approximately the user's sternum • Folding (collapsible) or rigid models available based on user preference • Segmented construction (typically 4–6 sections) with internal elastic cord for folding versions Material • Shaft: Lightweight and durable material such as aluminum alloy, fiberglass, or carbon fiber • Grip Handle: Ergonomically shaped, made from rubber or EVA foam for a secure and comfortable hold Tip (Ferrule): ➢ Made from durable nylon or metal ➢ Available in pencil, roller, marshmallow, or ceramic tip types based on terrain and user technique ➢ Easily replaceable/interchangeable Visibility Features Color: • White shaft for universal recognition of visual impairment • Red reflective bottom section (optional) to indicate dual sensory loss (e.g., deaf blindness) • Reflective surface or tape for night-time visibility and safety in traffic environments Dimensions & Sizes • Length options: Typically, available in 110 cm to 150 cm, in 5–10 cm increments • Selected based on user's height and arm reach • Diameter: Slim (~1.2 cm) for ease of handling • Weight: Lightweight: Generally, between 200–400 grams depending on material and length												
22. Semi-Digital and Digital hearing aids with program and volume control ISO Code: 22.06.15 	Devices worn behind the ear to amplify sound.	1. Product Description Personal amplification devices designed to assist individuals with mild to profound hearing loss. Devices are body-worn or ear-level and include behind-the-ear (BTE) or in-the-ear (ITE) types, suitable for pediatric and adult use. 2. Categories • Semi-Digital Hearing Aid: Digital Signal Processing (DSP) or programmable features via computer/software. • Digital Hearing Aid: Fully digital with DSP, programmable multiple channels, noise reduction, and feedback management. 3. General Specifications <table border="1"><thead><tr><th>Feature</th><th>Semi-Digital</th><th>Digital</th></tr></thead><tbody><tr><td>Technology</td><td>Digital hybrid</td><td>Full DSP</td></tr><tr><td>Channels</td><td>2–4 channels</td><td>≥ 4 channels (typically 4–16)</td></tr><tr><td>Fitting</td><td>Computer programmable</td><td>Computer programmable</td></tr></tbody></table>	Feature	Semi-Digital	Digital	Technology	Digital hybrid	Full DSP	Channels	2–4 channels	≥ 4 channels (typically 4–16)	Fitting	Computer programmable	Computer programmable

23.	Air Mattress / Pressure relief mattress ISO Code: 04 33 06	Effective alternating pressure system and is an ideal for prevention and bedsores treatment of patients at low risk of pressure ulcers.	1. Purpose: Provides redistribution of pressure to prevent skin breakdown and promote healing of pressure ulcers in patients who are bedridden, post-surgical, or have limited mobility. 2. Types • Foam Mattress: High-density or multi-layered foam with contoured zones																																	

JK / Sneha Khadka
Physiotherapist

	• Alternating Pressure Mattress (APM): Uses air cells that inflate and deflate cyclically via pump • Gel or Hybrid Mattresses: Combine foam and gel layers or air-cell systems for advanced support 3. Construction & Material • Top Cover: Waterproof, breathable, and antimicrobial fabric (e.g., PVC-free polyurethane), Removable and washable • Core Material: Foam: High-resilience (HR) or viscoelastic (memory) foam • Air: air cells with medical-grade pump, Optional gel-infused zones or corrugated surfaces for enhanced pressure distribution • Base: Non-slip bottom surface for stability on the bed frame 4. Pressure Redistribution Features • Zoned pressure mapping to reduce peak pressure on sacrum, heels, and shoulders 5. Dimensions • Standard Adult Size: • Length: 190–200 cm • Width: 85–90 cm • Thickness: 10–15 cm (foam); up to 20 cm (air or hybrid) • Pediatric and Bariatric Sizes as per the height and weight to be provided. 6. Weight Capacity • Standard mattress: Up to 120–150 kg • Bariatric models: Up to 250–300 kg 7. Pump Unit (for APMs) • Low-noise, vibration-free operation • Adjustable pressure settings • Visual and audible alarms for low pressure or power failure • Power input: 220–240V, 50/60 Hz 8. Safety & Maintenance • Fire-retardant materials • Infection controls compliant Easy to clean and disinfect

24.	LS Belt 	This product is well-designed with specially shaped, semi-rigid splints to effectively support and immobilize. It helps keep the lower back in a natural position and reduces low back pain.	• Semi rigid splint for effective immobilization • Pre shaped splints for postural correction • Elasticized body ensures strong comfortable compression • Highly porous elastic improves ventilation and breathability. • Double pull mechanism provides extra compression
25.	Knee brace 	Functional Knee brace is versatile knee support which offers the advantage of controlled compression around the knee and the rigid side support of a splint	• Provides effective support and compression to knee by use of four way stretchable tubular fabric. • Strong hinges provide rigid side splinting and free flexion movement. • Anti tourniquet strapping provides better grip and ensure no blood constriction • Silicon buttress along the patella opening • Biaxial hinge • Anti tourniquet effect • Four way compression
26.	KT Brace 	This product is well-designed with specially shaped, semi-rigid splints to effectively support and immobilize. It helps keep the lower back in a natural position and reduces low back pain.	• Semi rigid splint for effective immobilization • Pre shaped splints for postural correction • Elasticized body ensures strong comfortable compression • Highly porous elastic improves ventilation and breathability. • Double pull mechanism provides extra compression

Handwritten signature: Sneha Khadka Physiotherapist

27.	Neck Collar	Braces provide flexible support and compression	• High density foam with cotton stockinet provides effective immobilization, support, cushioning and comfort for user • Lightweight, breathable and comfortable • Velcro type closure • Washable
